

One Umbrella Setup:

Place the umbrella directly behind your camera.

Two Umbrella Setup:

Place the umbrellas about 2 feet behind your camera, with 7 to 9 feet between each other.

1. Find the spot that is 6 feet from your camera and 4 feet from the green screen and mark it with an X. This is where your subject will stand.
2. Make sure the light is 1 or 2 stops darker than the light on your subject — do not overexpose the backdrop.
